

# ENHANCING AUTO TENDER CAPABILITIES

ShipperGuide TMS Auto Tender feature has expanded capabilities to give shippers more flexibility when working with fluctuating markets and more complex shipping scenarios.

## AUTO TENDER - WHAT'S NEW?

Shippers often face challenges like rate instability and load rejections, especially when they are resolving issues manually. ShipperGuide's Auto Tender enhancements fully automate the tendering process, instantly offering alternate options if a primary tender isn't accepted—eliminating delays and manual intervention. With a customizable rules engine and access to multiple on-demand rates from trusted Marketplace providers, ShipperGuide empowers shippers to save on costs while maintaining a seamless, efficient operation.

1

### ANCHOR TENDERS

- The first tender set and sets the baseline for future tenders
- Prioritizes the lowest primary contracted rate
- If no contracted rate, it chooses the lowest rate that meets guardrail limits

### KEY BENEFITS

Streamlined tendering with reduced manual intervention.

2

### FALLBACK TENDERS

- Triggered only after an Anchor Text is sent
- Uses the first tender's rate as a baseline
- Considers both contracted and spot rates from the carriers

### KEY BENEFITS

Improved efficiency in handling unpredictable market scenarios.

3

### GUARDRAILS

- Threshold set by the shipper to prevent tenders from exceeding a specific rate

### KEY BENEFITS

Enhanced accuracy and reliability in booking shipments.

## TAKE CONTROL OF YOUR TENDERING PROCESS

Maximize efficiency and reduce manual intervention with ShipperGuide's enhanced Auto Tender capabilities. Start optimizing your shipping operations today by leveraging Anchor Tenders, Fallback Tenders, and Guardrails for more precise, automated tendering. **Contact us to learn how these new features can streamline your logistics.**
