

# GATE MANAGEMENT

## Overview

Extend your dock capabilities to the gate with a self check-in feature for drivers. Replace paper logs and unnecessary touch points by digitizing the check-in process. Simply allow drivers to check in via a QR code and have their status in Opendock automatically update to “arrived.” Through Opendock’s gate management feature, warehouses can further reduce congestion that increases dwell time and detention.

## Benefits

### REAL-TIME VISIBILITY

- Access real-time insights into driver arrivals

### SAVE TIME

- Eliminate unnecessary touchpoints between the driver and your warehouse team

### REDUCE CONGESTION

- Reduce yard congestion that contributes to longer dwell times and more detention fees

## Key features

**Automated carrier arrived status update**

**Appointment notes updated with driver’s information**

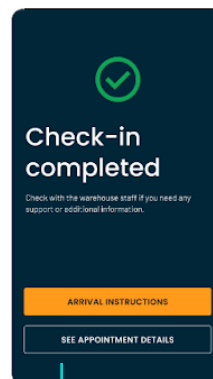

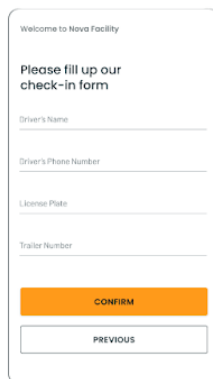

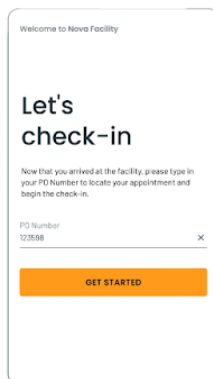

**Customizable required fields for check-in**

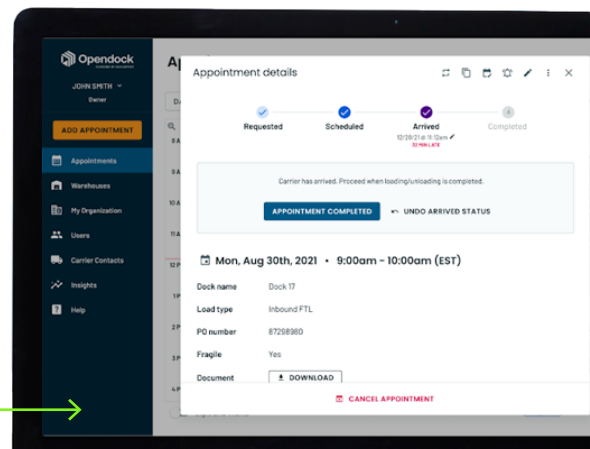

**Reports on appointments with self check-in**

**Customizable instruction message (post check-in)**
